Description

Different ADR bag types are always available in stock.

The ADR bag collects all the personal and vehicle equipment that must be on the truck when transporting dangerous goods. Choose, based on the primary and secondary hazards (hazard labels affixed to packages) of the goods you are transporting, one of the 5 ADR bags available from stock.

As prescribed in section 8.1.5 of ADR, every unit of transport for dangerous goods must be supplied with the proper general and personal protection equipment. Our ADR bags contain useful personal equipment for one operator only. If there is more than one operator on the vehicle, it is necessary to supply each of them with the personal equipment required for the transported type of goods.
